
FortiToken: Secure Multi-Factor Authentication (MFA) at your Fingertips.

- Enhance your Security
- Easy to Use
- Cost-Effective
- FTC compliant
- Most importantly, FortiToken can prevent data breaches

FortiToken is a security solution for remote users with TALON-managed firewalls. Your dealership will have the benefit of full implementation and management by our highly qualified TALON team.

FortiToken is offered by an industry leading securities provider and helps prevent breaches that occur due to compromised user accounts and passwords by increasing the certainty of the user identity attempting to access resources.

Android, iOS, and Windows mobile devices behave like a hardware-based OTP token without the hassle of having to carry yet another device. Approve or deny with one tap with push notifications.

FortiToken allows organizations to deploy a variety of token methods including one-time passwords, SMS tokens, and adaptive authentication. For even greater security, FortiToken lets you provide passwordless authentication for users based on FIDO and FIDO2 specifications.

Contact [TALON BD](#) to sign up for FortiToken.
